

How Do You Slash Staff Costs And Increase Performance?

The answer is simple — **ADAC® (Automated Dry-cleaning Assembly Conveyor)** from **Systemic**. This automated solution does the same job as more expensive models from our competitors, and is affordable for virtually any size cleaner. That means you don't have to be a big chain to benefit from the impact of automation technology on one of your largest expenses — staffing. ADAC is so efficient you can reassign key staff to more productive tasks or even eliminate redundant positions.

With ADAC, you'll reduce costly errors by electronically tracking garments and assembling orders — resulting in these and other benefits:

- Improved quality
- Enhanced customer service
- Increased productivity
- Lower cost of operation
- Fast return on investment

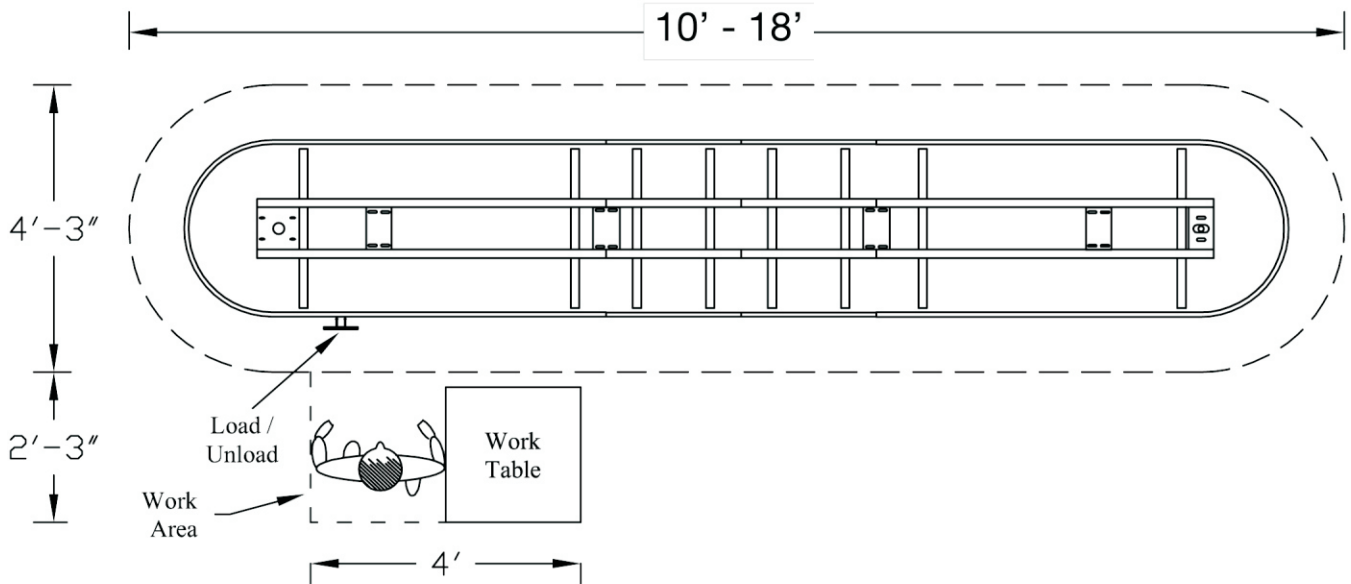

ADAC Features

- Electronic tracking and assembly
- Automatic order consolidation
- Electronic garment identifier (tags, bar codes, RF chips)
- POS-capable
- Ergonomical design
- Interactive touch-screen operation
- Advanced features for end of day reconciliation
- Modular design to fit a variety of locations and budgets

Worried about service after the sale? Never fear — **Systemic** offers an incredible level of personal service and support on **every machine** we sell. We understand that equipment downtime eats up profits, so we'll do all we can to keep you up and running.

ADAC[®]
AUTOMATED DRY-CLEANING
ASSEMBLY CONVEYOR
Patent Pending

Product Specifications

Scanner/Reader Capability

- Bar-code scanner
- RF scanner

Power/Space Requirement

- ADAC requires a standard 120 Volt Outlet
- Order volume determines size

Orders	Length
231	18'
175	14'
119	10'

Other sizes are also available.

Each ADAC system is a customized solution, engineered to meet your specific needs, building, volume and budget. ADAC can operate with or without a POS system.

To learn more about ADAC, see it in action at our website, or call us for a price quote.
